Professional Summary

Senior Full Stack (Back End focus) Developer with over 7 years of experience designing and scaling high-performance systems. Proven leader and mentor skilled in building REST APIs, microservices, and distributed systems with strong technical and communication skills. Over 5 years of successful remote collaboration across global time zones with distributed international teams.

Experience

EngageYa, Senior Backend & Full Stack Developer   Jan 2019 – May 2025
- Engineered backend systems handling 28,000 QPS with optimal latency.
- Optimized system performance, reducing response times by 75%.
- Led AWS migration from private infrastructure, saving thousands of dollars monthly and improving reliability.
- Designed scalable microservices architecture supporting multiple product lines across 6+ time zones.
- Implemented CI/CD pipelines with Jenkins, reducing release cycles by 50%.
- Mentored 5+ junior developers and onboarded new hires, improving team productivity and code quality.
- Collaborated with product managers on roadmaps and spearheaded new product launches.
- Developed REST APIs serving 5K+ daily active users with 99.9% uptime.

EngageYa, Junior Full Stack Developer   May 2018 – Dec 2018
- Developed backend systems in Java, Node.js, Angular and React.
- Building web-based automation tools for product integration.
- Analyzing and optimizing backend performance issues.
- Embedding and extending 3rd party APIs in existing applications.

Skills

Programming & Frameworks: Java, Kotlin, Node.js, Spring, SpringBoot, Hibernate, Angular, React

Databases: MySQL, MSSQL

Cloud & DevOps: AWS, Docker, Jenkins, Git, CI/CD

Architectures: REST APIs, Microservices, Scalable Distributed Systems

Languages

Hebrew: Native speaker

English: Native speaker

Interests

- Smart home system development using Raspberry Pi and open-source tools
- Automated CRM-invoice system development for small business
